Claim 1 teaches a method for manufacturing a magnetic disk. The distinguishing elements of the claim teach observing the track zero on the magnetic disk using a Kerr effect microscopy device; measuring first and second distances from a predetermined point to first and second selected points on the track zero on the track zero; and adjusting calibration of the servo writer using the first and second distances.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
